PROFILE

Computer Science graduate trained in JavaScript, Python, React.js, Tailwind CSS, and REST APIs. Built a working full-stack web application for my undergraduate thesis project that detects defects and grades mango quality from single-frame images in real time, using YOLOv8 and ResNet models served through a Flask backend. Completed a Salesforce Developer internship through Accenture Academy using Apex and Lightning Web Components (LWC).

TECHNICAL SKILLS

- Programming Languages: JavaScript, Python, Java, C, C++, SQL
- Web Development: HTML5, CSS3, React.js, Tailwind CSS
- Backend and APIs: Flask, REST APIs
- Tools: Git, GitHub
- Salesforce: Apex, SOQL, Lightning Web Components (LWC), Salesforce Flow
- Machine Learning: PyTorch, OpenCV

PROJECTS

Mango Quality Assessment and Defect Detection System (Undergraduate Thesis)
Flask, Python, JavaScript, HTML, CSS, PyTorch, OpenCV

- Developed a full-stack web application using Flask, Python, HTML, CSS, and JavaScript to evaluate single-shot fruit images for quality grading.
- Integrated YOLOv8 for fruit localization and defect detection alongside a ResNet architecture for detailed classification.
- Implemented image preprocessing and model inference workflows using PyTorch and OpenCV to process single-frame inputs and display real-time results.

Personal Portfolio Website: cestzy.is-not-a.dev/
React.js, Tailwind CSS

- Designed and built a responsive portfolio website using React.js and Tailwind CSS to showcase projects and experience.

RELEVANT EXPERIENCE

Salesforce Developer Internship | Accenture Academy | *Feb 2026 - Apr 2026* Certificate Link

- Completed 447 hours of hands-on Salesforce platform development training through Accenture Academy.
- Built Apex classes, SOQL queries, and Lightning Web Components (LWC) with JavaScript, HTML, and CSS through guided hands-on exercises.
- Configured custom objects, fields, and page layouts, and automated business workflows using Salesforce Flow.
- Completed 17 Salesforce Superbadges simulating real-world business scenarios, applying requirements analysis, workflow automation, component development, and testing.

EDUCATION

Bachelor of Science in Computer Science: Specialization Track in Data Mining
Isabela State University - Cabagan Campus, Isabela | Graduated 2026
